OKLAHOMA. test in the southwest corner of the southwest quarter of 21-14-14 is making 1,300 burens in the Booch sand, according to reports from the owners. Chicokee \$ \$ 23 50 to Total April ... 275 126.360 Total April ... 524 146,028 Summary of New Work.

completed in its immediate vicinity, has been finished north of Yale and seven notes in notance of the Cushing pool. It is making 100 barrels after a shot. Another experimental well 10 inter-west of the Cushing nool has a showing for 50 barrels in the Layton send, and opens prospective territory, although there are a number of ary holes in the inter-venue area.

Decrease 58 19,861 19 12 In a recent competetive bidding conducted by the government for the in-Rigs and Drilling Wells.

May in the Oklahoma, Kansas and Arkansas portion of the Mid-Continent field has very little of interest to ofter outside of the wonderful Cushing pool, where the largest number of completions in some time were registered, although there was a simm in South production when compared with the previous month's figures. Kansas and Arkansas had nothing to offer in the way of important completions and the Cole pool was the only other development in Oklahoma to offer fair wells.

There were 299 completions in the above districts, of which 41 were dry above districts, of which 41 were dry and 36 were gas wells. The new production amounted to 126,470 barrels, or 18,561 barrels less than the preceding month. The completions were 58 short from the April figures and the dry holes decreased 16 and the gas wells 12.

There was a slight gain in new developments at the close of the month. There were 144 rigs and 564 drilling wells, a total of \$98. In comparison The

At Boynton.

No report had seen received yester-day from the several wells in west-every wells in the figures for April, there is a homa, but it was expected as there is

and the dry holes decreased 16 and the gas wells 12.

At Boynton.

No report had seen received yester-day from the several wells in west-every wells in west-every wells in the figures for April, there is a gain of 17 in rigs and three in drilling wells, or a net increase of 20 in homa, but it was expected as there is

At Boynton.

No report had seen received yester-day from the several wells in west-every wells in west-every record in Tulsa County.

The Kansas Natural has moved in a machine for a test in the northeast of the south-homa. The business of the south half of the south-homa, but it was expected as there is
